1. SUMMARY

Micro, small and medium enterprises (MSMEs) make up over 97 percent of all enterprises and generate more than 70 percent of all jobs. However, MSMEs continue to face challenges on several fronts, impairing their ability to gain entry to regional and global markets, or even to be part of global value chains (GVCs).

The project “Capacity Building Workshop Series on APEC e-Instruments Utilization: Series 1 on APEC MSMEs Marketplace Utilization” (SME 07 2018A) aims to promote and facilitate MSME participation in GVC and international trade through the APEC MSME Marketplace.

This project is aligned with the 2018 APEC theme “Harnessing Inclusive Opportunities, Embracing the Digital Future”; the 2017 APEC SME Ministerial Statement that calls for accelerated implementation of the Iloilo Initiative by focusing on building the content and functionality of APEC MSME Marketplace; and the Boracay Action Agenda, SMEWG Strategic plan 2017-2020 and PPWE Strategic Plan 2015-2018.

The objectives of the project are:

- Explore the opportunities of APEC MSME Marketplace platform for the key stakeholder in fulfilling export tasks such as to get relevant information, get in touch with Trade, Export and SME agencies, other, and share and exchange of experience and best practices in APEC SME Marketplace utilization between stakeholders.

- Provide networking opportunities for the key stakeholders - representatives from Trade, Export and SME Agencies from public and private sector, exporting MSMEs, service companies from private sector who provide support for the exporters/importers with the aim to reduce red tape, cost and time associated with international trade.

- Produce recommendations on how to strengthen and enhance the content and functionality of APEC MSME Marketplace.

The project proposed three outputs:

Output #1: Case Studies: Opportunities of the APEC MSME Marketplace platform for key stakeholders (the Trade, Export and SME Agencies from public and private sector; exporting MSMEs and service companies from public and private sector who provide exporters/importers with support in fulfilling export tasks, hereafter key stakeholders) were explored. Training materials for the workshop, feedback and recommendations were developed on the basis of this work.

Output #2: Workshop: A two-day workshop was held in Makati Diamond Residence, Makati, the Philippines on 30 and 31 October, 2019. The event was organized by Russia in close collaboration with the Philippines and with valuable contributions of Malaysia, Mexico, Chile, Indonesia, Hong Kong, China and Singapore.

This capacity-building workshop engaged representatives from Trade, Export and SME Agencies from public and private sector; and exporting MSMEs and service companies from public and private sector who provide support for the exporters/importers (herein after the key stakeholders) of different economies, such as Russia, the Philippines, Malaysia, Mexico, Chile, Indonesia, Chinese Taipei, Hong Kong, China and Singapore.

During day one, participants got familiar with the APEC MSME Marketplace and went through practical exercises. They tried to find relevant information for their particular needs information and
to see which trade organizations they could connect on the APEC MSME Marketplace. Besides, participants investigated how to find potential partners by using MSMEs directories of different member economies and what is the best way to get in touch with them. Also, they looked for local private and government marketplaces where they can introduce their products or services. This was an interactive activity carried out as a part of the marketplace walkthrough.

Then representatives from Trade, Export and SME government-related Agencies from different economies shared their existing opportunities for exporting/importing MSMEs and helped MSMEs to navigate among these opportunities.

During day two, MSMEs from different industries and economies shared their feedback on the APEC MSME Marketplace and other similar e-platforms. In the last session, the open discussion intended to engage every participant to share their feedback and thoughts on improving the APEC MSME Marketplace. Singapore and Malaysia provided their feedback and recommendations in written form. These documents can be found in the present Report.

The workshop program, workbook and other related materials are provided in ANNEXES at the end of this report. The workshop presentations can be accessed through this APEC Mddb link.

Output #3: Final report: The present Report provides findings from the Capacity Building Workshop Series 1 on APEC MSME Marketplace utilization as well as from the Case Study developed before this activity. The report includes:

- scope of export tasks that were explored during case study stage and can be covered by APEC MSME Marketplace;
- profiles of the best practices;
- list of contact points of Trade, Export and SMEs Agencies and local service companies from private sector;
- feedback and recommendations

Finally, we appreciate the Philippines, Singapore, Malaysia, Mexico, Chile, Indonesia, Hong Kong, China, Chinese Taipei, ABAC and the APEC Secretariat for the valuable contribution to this initiative and reliable support during its implementation. Together we can do more for MSME trade facilitation across APEC region.

We are looking forward to further collaboration!
2. APEC MSME MARKETPLACE

https://apecsmemarketplace.com

APEC MSME Marketplace is an e-instrument designed to promote cooperation and linkages across MSMEs and other stakeholders with interest in MSME development. It is of great importance to facilitate regular usage of it and to promote it across stakeholders in APEC.

The online portal has the following functionalities:

- Facilitating business matching for MSMEs, funders, innovation centers, incubators and other stakeholders with interest in MSME development.
- Providing information about international trade standards and regulations.
- Disseminating information on available trade promotion assistance packages that APEC economies individually or collectively provide for MSME development and internationalization.
- Building networks and linkages among the MSMEs, education and innovation centers, and other relevant stakeholders that have a shared interest to foster MSME participation in regional and global supply chains and markets they may face as they participate in global trade.

The APEC SME Working Group, under the leadership of the Philippines as Chair of the Technical Ad Hoc Group, tasked to administer and prepare the Implementation Plan of the APEC MSME Marketplace, created this online platform. This initiative for small business is supported by the APEC member economies and the APEC Business Advisory Council (ABAC).

The Philippines requested member economies to help populate the site and give feedback for its further improvement.

In the sections below one can find useful information on APEC Marketplace utilization and its further improvements.
2.1. Scope of export tasks that can be covered by APEC MSME Marketplace:

Export tasks mentioned in the official APEC MSME Marketplace description were taken into consideration, particularly the tasks that MSMEs face at the very beginning of their export activity, with the aim to help them make their first steps. The examples provided in this section help to understand what kinds of export task can be covered by APEC MSME Marketplace and how.

**EXPORT TASK #1**

Find relevant information:

- market volume;
- trade statistics exported and imported goods;
- import preferences;
- certifications needed;
- trade regulations;
- trade agreements;
- trade process;
- tariffs;
- other.

Examples of HOW to find the relevant info at the APEC MSME Marketplace

**MARKET VOLUME**

- THE PHILIPPINES

**IMPORT PREFERENCES**

- INDONESIA

**TRADE FACILITATION**

- PERU
EXPORT TASK #2

Get in touch with organizations that can provide relevant support

LOCAL ORGANIZATIONS CAN SIGNIFICANTLY FACILITATE EFFORTS OF MSME IN ENTERING FOREIGN MARKET AND HELP TO:

- provide relevant information;
- find potential partners;
- arrange a B2B meeting;
- arrange events participation;
- help with starting a business in an economy (register business, provide free office, hire staff etc.);
- find training programs for MSMEs;
- other.

HOW to find such organizations on the APEC MSME Marketplace?

TRADE AGENCIES
Export & SME Agencies > *economy*
Resources > Training and Resources > *economy*

ASSOCIATIONS
Member Economy > *economy* >

PRIVATE COMPANIES
Member Economy > *economy* >
EXPORT TASK #3
Get in touch with potential partners

WHAT to start with?

- Determine your potential partner, describe its profile.
- Search for the companies that meet your profile.
- Learn about the interests of your potential partner. Look through the website, read news, check portfolio and try to understand business priorities they are working on now. Try to connect your proposal and the priorities of a potential partner. Develop an INDIVIDUAL proposal for each partner.
- Keep in mind that it is better to get in touch with decision makers in the company and write personal invitation for cooperation to CEO.

HOW to find partners on the APEC MSME Marketplace?

There are several ways to find potential partners on the platform

THROUGH MSME DIRECTORY
MSME Directory > *economy*
- MSME directory > Papua New Guinea > Emstret Holdings Limited
  https://www.emstret.com/

THROUGH TRADE ORGANIZATIONS
Member Economy > *economy* > Export and SME Agencies
- Member Economy > Japan > Jetro > to Japan >
  Directory for Doing Business in Japan

THROUGH LOCAL MARKETPLACES
Marketplaces > Government/Private > *economy*
- Marketplace > Government > Republic of Korea > tradeKorea >
  Matching services > Global Business Matching Service
  https://www.tradekorea.com/ebms/gbms.do
EXPORT TASK #4

REGISTER ON THE MARKETPLACES

Registering on the marketplaces means:
- possibility to sell your product directly to the customer;
- possibility to buy directly from the producer;
- increase the probability to find partners;
- ensure additional advertisement for the product;
- keep the trade secured by regulations of the marketplace.

HOW to find marketplaces in different APEC economies on the APEC MSME Marketplace?

MARKETPLACES
Marketplace > Government/Private > *economy*

Be ready to provide the below mentioned info upon registration:

1. information about the company (name, address, type, slogans, logo, history, website, contact data);
2. information about the product/service (products lineup, photo, overview, description, product advantage, photo);
3. certifications, trademarks, patents, awards;
4. media publications;
5. trade details (currency, export performance);
6. terms of packing and shipping.
2.2. Best practices of APEC Marketplace utilization

Some MSMEs that successfully utilized APEC MSME Marketplace for their current export tasks are introduced in this section. These companies explored APEC MSME Marketplace in their current export activity and succeeded. These stories show how MSME Marketplace can help MSMEs to cover their current export tasks while making first steps on the foreign market and provide feedback on difficulties they met on the way and recommendations how to improve the APEC Marketplace.

Case Studio is the fast-growing MSME, the technology provider, that develops and deploys CasePlatform.

CasePlatform is a low-code universal designer for creating business applications without involving programmers. The solution is cost-effective, multifunctional and easy to use.

Nowadays, the CasePlatform has been successfully implemented in financial, medical, automotive, government services, telecommunications and marketing services.

During case study stage, the company tried to cover their current import tasks, namely find trade organization, potential partners and relevant local marketplaces. The team defined the profile of a potential partners as system integrators, IT service providers or IT solutions distributors. They have found some on the APEC MSME Marketplace and reached out to these companies and got interest for cooperation! Now they are in communication.

The most complicated task was to find a suitable marketplace for IT company, as there were no local marketplace-type e-platforms for software developers on the APEC MSME Marketplace. For covering this task, the team has found global platforms for selling digital products such as Gumroad and Easy Digital Downloads.

Feedback and recommendations

The Case Studio participated in the workshop on the APEC MSMEs Marketplace Utilization in the Philippines and had an opportunity to speak in front of policy makers and other key stakeholders about their experience. Company have provided a feedback and recommendations on the APEC MSME Marketplace improvement:

- create categories in MSMEs directories, now all the companies are listed in a single patch and it takes a lot of time to find a relevant company;
- more structured information and simple navigation;
- add marketplaces and other resources for software developers;
- the workshop helped the Company to get familiar with all the opportunities of APEC MSME Marketplace. There is plenty of useful information on the APEC platform for MSMEs to make their first steps to the foreign markets: “And this is actually what is the best about the Marketplace, because many MSMEs capable of exporting their products do not know what to
do and who to ask for help. Now it is clear where to look for and who to address.” – shared
the company representative.
- accumulate additional instruments for exporting companies, such as tax policy handbooks;
- provide some interactive help on functionality of the Marketplace. Some functions are not
easy to find, so it would be of much help.

Jocyl’s Food Products “Chorizo De Kalibo” from the Philippines is a family-owned small and
medium enterprise, that was established in 1991 and formally registered with the Department of

Major products of the company include processed meat and delicacies such as Cassava Cake, Crispy
Shrimps, Chicharon and Banana Chips. The company also offers several organic products, e.g. Coco
Sugar and Turmeric Tea. Since 1991, company grew from a little store in Aklan Province to the
company, which products are being recognized and sold in food markets of the Philippines.

Recently the company's management decided to go to the global journey, that is to say, to export their
products to other APEC economies.

With that aim they took part in Capacity Building Workshop Series on APEC e-Instruments
Utilization on the 30-31 of October in Manila. During the workshop the company got familiar with
opportunities of the APEC Marketplace. Armed with new knowledge and contacts, they were able to
make fruitful collaboration with a company from Republic of Korea. And now, Jocyl’s Food Products
is getting ready for its first batch to be sent to Korean customers.

The company considered the APEC MSME Marketplace as an exceedingly useful tool for small
companies, that want to export.

Thus, the export experience of MSME has just begun; and it began with the help of APEC MSME
Marketplace and workshop on its utilization. This is a vivid example of how APEC MSME
Marketplace and training on its utilization can facilitate MSMEs international trade activity.
Novaya Khimia LLC is a part of a “DI-Group” technological holding. Since 2015 Novaya Khimia has been inventing, developing and manufacturing innovative materials for children’s arts and crafts. The network of the company includes 57 cities in Russia.

The newest product of the company, Zephyr, is a kinetic plasticine for kids, that helps to develop soft skills and provides children with a completely new playing experience. Zephyr is patented and certified internationally.

During the case study stage the company tried to cover their current export tasks. They have been trying to export Zephyr to the APEC economies. And they started with looking for relevant information about wanted markets, such as import preferences, market volume, HS-code etc. And succeeded.

After choosing the economies to work with (the Philippines and Chinese Taipei), several trade organizations, such as TAITRA and Philippine International Trading Corporation were contacted. But, regrettfully, with no success. The main challenge was a language barrier. At the same time, they were looking for potential partners, such as toy importers, distributors and retailers. Some were selected in the MSMEs Directories of the APEC MSME Marketplace, some were found through the Google search in consequence of limited numbers of suitable companies on the APEC MSME Marketplace. They got feedback from some companies, and now they are trying to develop communication and to discuss possible ways of how to start cooperation. The following local marketplaces were found through the APEC MSME Marketplace: Taiwantrade, Lazada and Shoppee. Novaya Khimia LLC is planning to introduce their products on these marketplaces in early 2020.

Novaya Khimia was impressed by features provided by the APEC MSME Marketplace and was upset by difficulties they met.

The feedback and recommendations:

1. It is difficult to find partners. The interface is not user friendly, so you cannot find a list of partners working in needed field in one-two steps. It would be great to make the interface more user-friendly and provide categories for easy search.
2. Our company is looking for such partners as big malls, toys shops and big international distributors, but there are no such partners on APEC MSME marketplace. Please add more such companies to the platform.
3. More information about certification rules for each economy is necessary. For example, production of toys in the Philippines requires CE, ASTM, LHAMA certificates. It would be good to have the relevant information for each industry. If there is testing labs that can help with it, it would be good to add them on the platform.
2.3. List of contact points of Trade, Export and SMEs Agencies and local service companies from private sector

This list was developed during the case study stage with an aim to inform exporting MSMEs about support measures available in APEC economies. It includes both government and local private organizations that provide relevant support for exporting/importing MSMEs. The project team considers the importance of contact data; for that purpose, the list contains names and email addresses of CEOs or leading managers. All data was found in the open sources.

2.4. Feedback and recommendations

2.4.1 Recommendations Based On Case Study

The majority of export/import tasks at the first stage of entering foreign markets can be solved by the APEC MSME Marketplace even today, but due to some reasons shown below, it is very hard to use the APEC MSME Marketplace and it takes a lot of time to navigate through it. Still, these difficulties can be solved by minor efforts, such as checking the content and training MSMEs on APEC MSME Marketplace utilization. Details on these efforts are provided in Action Plan section in this report.

2.4.1.1. Content

1. Language barrier
   
   APEC MSME Marketplace is an international platform, designed mainly for international users, so all the resources on the platform have to be in English. When economies provide the link to the particular website, there should be a version in English, so users can benefit from this information. All information in language different from English (for example, in Spanish, Chinese or Thai) is regarded as useless, because international users are not able to use it.

2. Out-of-date information and invalid links.
   
   It is necessary to update the information on a regular basis. Otherwise, it may cause problems for MSMEs as they could make wrong decisions on this non-accurate data.
   
   - Information and links should be checked thoroughly in order to correspond to certain criteria before placing on the APEC MSME Marketplace.
   
   - Duplications should be deleted.

   Table of problems examples with the links can be found in the ANNEX 3.

3. Lack of information about APEC awards, challenges and events in APEC economies, and other opportunities.

   The information about challenges open worldwide is recommended to be placed in the Financing opportunities section. This information was developed for the APEC Financing Opportunities Fair for women-led MSMEs and is ready to be placed on the APEC MSME Marketplace.

2.4.1.2. Functionality:

1. It is hard to navigate through lots of information; and it takes a lot of time to find relevant information or resource. Recommendations:
   
   - to delete useless information and links;
   
   - to shorten the way to a certain piece of information by restructuring the information on the platform. It should be done in collaboration with MSME representatives;
   
   - to categorize MSMEs on the APEC MSME Marketplace and provide easy search;
   
   - to provide online support. This can be done by every economy as a part of export facilitation activity. A training for trade/export agencies representative across APEC can help to disseminate the knowledge on how APEC MSME Marketplace can be used by MSMEs in their export/import activity.

2. Better infrastructure for direct trade and communication between MSMEs would be beneficial for every participating economy.
- An example of relevant infrastructure can be AirB&B platform, where you can choose an apartment (product/service), get in touch with the host (producer/manufacturer/farmer), and pay for the product through the platform. Then you give feedback on product/service and producer/manufacturer/farmer, and get feedback from producer/manufacturer/farmer on you as a buyer/partner. Based on this feedback, products/services, MSMEs as producer/manufacturer/farmer, and MSMEs as buyer/partner will have a rating on the platform. This would help other users to choose the best products/services and reliable partners in different APEC economies to work with.

2.4.2. Recommendations from Key Stakeholders

Representatives from Malaysia, the Philippines, Indonesia, Chinese Taipei, Viet Nam, Singapore, Hong Kong, China and Russia explored APEC MSME Marketplace opportunities and shared their feedback and recommendations on its improvement.

All participating economies mentioned the lack of effective promotion of the APEC MSME Marketplace among APEC economies and MSMEs.

The major finding was that even though so many useful information for exporters/importers can be found at the APEC MSME Marketplace today but very few people know about it and, therefore, it has not too many users yet.

A key recommendation is to provide more promotional activities for the APEC MSME Marketplace across APEC to get the key stakeholders familiar with it.

Recommendations shared by the experts/participants during the workshop:

1. Regarding information, it is necessary to develop/provide the following:
   - demo video/short guide on how to use the platform;
   - information on benefits for MSMEs APEC members;
   - export guides for each economy B2C;
   - export guides for each economy B2B;
   - information about events, especially on G2G level;
   - more information about the buyer of the wanted market;
   - simplified/easy explanation on trade/custom procedures;
   - internal dictionary of trade terms;
   - information about government programs for foreign MSMEs.

2. Regarding tools, it is necessary to develop/provide the following:
   - networking platform inside of the APEC Marketplace, where MSMEs can meet and communicate (Communication with Importers & Business Partners via Online Chat);
   - business matching tool;
   - search for product harmonized system code (HS code);
   - database of trade organizations, buyers, exporters and importers of the APEC economies.

3. Regarding Services for MSMEs, it is necessary to develop/provide the following:
   - support in creation of potential partner profile;
   - opportunities for further collaboration with logistics providers in order to facilitate movement of goods, and with financial institutions, for trade finance;
   - product promotion;
   - export assistance.
4. Regarding Protection, it is necessary to develop/provide the following:

- protection of copyright;
- cybersecurity;
- possible protection from unreliable customers and partners;
- secure payments.

Some economies provided written feedback and recommendations. We reproduce below a summary of those recommendations.

2.4.2.1. Feedback and Recommendations from Singapore - Enterprise Singapore

a) Feedback on APEC Trade Repository on APEC MSME Marketplace Website

Our comments will focus on implementing a consolidated trade database that could serve as a one-stop depository to help MSMEs find relevant trade information for regional markets.

APEC is continuously working to enhance website user experience for companies, especially related to accessibility of information for APEC MSMEs. Thus, APEC may wish to consider initiating or hosting a reliable trade information database to facilitate MSMEs access to information.

Currently, the APEC trade repository consists of links to various fragmented sources and pieces of information, rather than specific tariff and non-tariff information. With a consolidated/integrated database, APEC could achieve the following objectives:

- Enhance the content available on the website, leading to various calls to action which are important for APEC MSMEs.
- Improve usability of the website with well-developed and phrased content. The intuitive browsing experience and concise messages could make it much easier for companies to take action.
- Increase confidence of companies to do business within the APEC region.

Some of the key information may include:

- MFN tariff rates;
- preferential tariff rates;
- rules of origin applicable to the implemented trade agreements within the APEC region; and
- import formalities (import procedures and documents) within the APEC region.

Some of the shortcoming examples we have observed on the Trade Repository webpage are as listed below.

The Papua New Guinea information is outdated. Provided tariff nomenclature is the HS 2012 version, while Papua New Guinea had already rolled out the latest HS 2017 version: it is already available to Singapore-based MSMEs under Singapore’s Tariff Finder online tool, and it gives our MSMEs an edge over other APEC MSMEs.

As a result of the Tariff Finder launch in 2017, MSMEs in Singapore have unlimited access to tariff and non-tariff information, which was difficult to obtain before. The information is comprehensive, it covers more than 150 destinations for tariffs and more than 122 destinations for import formalities.

There have been made about 50,000 queries; and about 2,000 users have benefitted from the tool since it was implemented.
In order to make it productive for every involved party, it may be necessary to re-allocate funding and to outsource the Trade Repository webpage to a trusted external vendor, who has strong credentials on handling trade, tariff and export/import issues.

A recommendation is to use Singapore’s Tariff Finder as a benchmark, possibly, replicate something similar at APEC regional level in order to replace the Trade Repository webpage.

b) Feedback related to the proposed creation of an app to aid exporters and importers of the APEC economies when using the APEC MSME Marketplace

When Enterprise Singapore was planning the rollout of Singapore’s Tariff Finder, we have faced the question of either rolling it out as an app or as a web-enabled, mobile-responsive website. There was considerable interest in exploring the app function, meaning that users must first download the app, and after the content provider (ESG) must constantly service, maintain and update it. But after we did a cost-benefit analysis and realized, that there may be not sufficient amount of users who will use the app on a regular basis. Also, the app maintenance requires a lot of labor efforts and back-end work, including related resources. It is quite expensive. Hence, we eventually decided to go for the current web-enabled, mobile-responsive website format.

APEC MSME Marketplace website is accessible and mobile-responsive on all devices (desktop computers, laptops, mobile devices like iPads and smart phones). So, the current format does work. We should also consider the availability of resources, both financial and manpower, as the idea is to keep the services free. Thus, an app may increase costs for all involved.

2.4.2.2. Feedback and Recommendations from Malaysia - Ministry of Entrepreneur Development

- The mobile-smartphone interface of APEC MSMEs Marketplace needs to be more user-friendly. Hence, the introduction of an app is indeed a good idea. It follows current trends, whereas users tend to rather use an app then surfing the web, since it is much faster and easier to access. SMEs would tend to access the platform more often, since it would be more accessible.

- Such tools as Tariff Finder would definitely bring benefits to MSME exporters/importers. APEC MSME Marketplace would be more effective if users had such tools. Some of MSMEs (users) from APEC economies would probably contribute to defining the real cost of implementing this. Therefore, series of meetings/discussions between economies would be ideal way to move forward on this particular matter.

- APEC MSME Marketplace functions as a One Stop Centre for MSMEs. It provides the users with information regarding trade regulations, relevant agencies and directories of MSMEs. The content should include Ministry of Entrepreneur Development, Malaysia (MED) as the ministry responsible for the development of MSMEs in Malaysia. In terms of the functionality, the platform provides links to relevant agencies in the economy. However, some of the links are connected to a website that is not in English. The language barrier will make it difficult for MSMEs to understand information, making it less effective.
2.4.2.3. Feedback and Recommendations from Indonesia - Marketing Services Agency for MSMEs (LLP-KUKM)

- More promotion by advertisement or business activities (seminar, forum, business matching, socialization) to engage more users / MSMEs.
- Update information. Any information regarding promotion and events is very important for Indonesian MSMEs. This information should be updated by the administrator.
- Mobile app and user-friendly interface. It should be available in App Store and Play Store.
- “Powerful search section” like Google search must be provided, since there is a lot information in APEC MSME Marketplace.
- More workshops.
3. CONCLUSION

These section underlines Case study results and conclusions elaborated by the experts/participants during the workshop.

APEC Marketplace facilitates the efforts of MSMEs to enter new markets. The project has shown that export/import tasks can indeed be covered with the help of the APEC MSME Marketplace. Nevertheless, MSMEs still do not utilize it for their trade needs and the main reasons for this are:

1. **Lack of promotion across APEC and among the key stakeholders** (Trade, Export and SME Agencies from public and private sector; exporting MSMEs and service companies from public and private sector who provide support for the exporters/importers). They do not know that APEC MSME Marketplace can be used to facilitate MSMEs export activity.

   It is of great importance to promote the APEC Marketplace among APEC economies to make key stakeholders recognize and use it. And to provide regular trainings on how to use APEC Marketplace.

2. Another great obstacle is **the immense amount of various information, which is not clearly structured and sometimes is useless**. Many websites provided on the platform do not support English language. Information on companies provided unevenly: some of the economies provided a lot of information, other economies – very few.

   Content needs to be checked thoroughly in order to correspond to certain criteria and put on the platform in the way to be easily accessible. It should be underscored to the APEC economies, that submission of relative information and updating the database of companies plays a great role in developing international trade between MSMEs.

3. **It is not vivid what MSMEs needs can be covered by APEC Marketplace**. Functionality can be improved by creating user-friendly, easy to navigate interface and useful services and tools for MSMEs mentioned in recommendations.

On the one hand, the project proved the usability and prospects of the APEC MSME Marketplace. It revealed detailed information on pain points and provided recommendations that can help to make APEC Marketplace more effective for the key stakeholders. Details on how to improve the situation are provided in the ACTION PLAN section.

It is a one-of-a-kind platform, with the help of which MSMEs are able to grow their business. The undoubtable advantage of the APEC Marketplace is global accessibility for every entrepreneur in the most remote areas of APEC economies. It is able to take MSMEs to a brand-new level of the international activity and foster the well-being of economies in general.
This action plan was elaborated in close collaboration with the Philippines and on the basis of feedback and recommendations collected from the experts/participants during the workshop.

Participation of all APEC economies in its implementation should be emphasized for the purpose of mutual improvement of beneficial results of all APEC economies, in order to solve current issues and make APEC Marketplace an effective instrument in MSME trade facilitation.

Medium

1. To restructure information and resources on the platform in accordance with MSME export/import needs and road map of export activity.
2. To collect and upload useful information, such as the information about challenges open for MSMEs worldwide in the Financing opportunities section.

1. Add more tools and provide access for MSMEs.
2. Develop effective infrastructure for direct trade between MSMEs (co-propose APEC project)
3. Provide some interactive support on functionality of the APEC e-platform, chat box, for example (can be supported by every APEC economy in their native language).

1. Co-propose an APEC project aiming to set a network of trade facilitators who will facilitate MSMEs export activity through APEC e-platform.

Regular basis

Economies are welcome to discuss proposed Action plan and their contribution.
5. FUTURE COLLABORATION PERSPECTIVE

It was the first workshop in the series during which we evaluate the current state of the APEC e-MSME Marketplace and plan further collaboration in trade facilitation for MSMEs across the APEC region through APEC MSME Marketplace.

While implementing this initiative, we found out that every economy does their best to provide their exporting MSMEs with relevant support, but it is not enough nowadays, so we have to change the approach.

If we want to facilitate MSMEs export activity, we have to think about the support of foreign MSMEs exporters (importers). Keeping our local interests, we need to create a supportive infrastructure for MSMEs across the whole APEC region. We need to build the infrastructure that will allow MSMEs to trade with each other freely; and the main element of this infrastructure might be a common digital platform connected to local platforms in every particular economy - the APEC MSME Marketplace.

Let’s make it clear what does Direct trade between MSMEs in APEC to every particular economy and its people mean.

It means:

1. more diverse row of goods and services;
2. fair competition;
3. value-cost ratio. When MSME buys directly from MSME, every element of the chain wins: the MSME that sells, as it sells at a competitive price; the MSME that buys, as it buys at a competitive price; the customer who buys from MSME in a local economy, as it offers more fresh products and high-quality goods directly from the particular territory, at a competitive price.

All this affects the quality of life, and even remote territories would get access to diversity and high-quality goods and products. MSMEs from remote territories would be able to find their customers in different corners of the globe.

The picture is attractive, but bringing it to reality takes time. What difficulties will we meet on the way and how can these difficulties be solved? What stakeholders do we need in order to make it effective and safe? These are the questions we suggest to work on in 2020-2024. If we want to facilitate the trade between MSMEs in the APEC region tomorrow, we should start working today.
## AGENDA

Capacity Building Workshop on APEC MSMEs Marketplace Utilization  
Makati Diamond Residences  
Manila, The Philippines

30
12:00-13:30 Lunch

13:30-15:00 Session 2

Business matching and other useful opportunities at APEC MSME Marketplace

During this session, representatives from government-related and other organizations promoting mutual trade and investment between a particular APEC economy and the rest of the world, will present their existing opportunities for exporting/importing MSMEs and help MSMEs to navigate among these opportunities. Success cases from MSMEs that utilized proposed opportunities and succeeded in export/import activity will be shared during this session.

Moderator: Ms. Janette Toral (The Philippines)

Speakers:

1. Ms Maribeth Barros, Manila Consultant for Hong Kong Trade Development Council (Hong Kong, China)
2. Mr Mohd Faizal Dolah, Ministry of Entrepreneur Development (Malaysia)
3. Mr Wisnu Tri Baskoro, Head of Section for Foreign Trade, Marketing Services Agency for MSMEs (LLP-KUKM) (Indonesia)
4. Mr Marco Labios, 1Export, (The Philippines)
5. TBD

15:00-15:30 Coffee break

15:30-16:30 Session 3

What tools can be found at APEC MSME Marketplace? Where to find and how to use them?

Information on tools that are available for MSME exporters/importers will be shared.

Experts:

1. Ms Janette Toral (The Philippines)
2. Mr Boon Ho Toh, Deputy Director, Trade Enterprise Singapore (Singapore)
   Tools to Help MSME Exporters/Importers Enter Overseas Markets in APEC

QA session

Day 1 Closing
PART 2: WORKSHOP ON MSME MARKETPLACE AND TRADING IN ASIA-PACIFIC REGION

10:00-10:40  
Session 1

Voice of MSMEs (panel discussion)

*Feedback and recommendations from exporting/importing MSMEs on e-platforms. During this session, MSMEs from different industries will share their feedback on the APEC and other e-platforms of that kind. We will discuss what export/import tasks can be covered by the platform. MSMEs will provide their recommendations on content and functionality of e-platforms.*

**Moderator:** Ms. Janette Toral (*The Philippines*)

**Panel:**

1. Mr. Ilya Zimbitski (*Russia*)
2. Ms. Euis Rohaini (*Indonesia*)
3. Mr. Jesus Gonzalez Grana (*Mexico*)
4. Mr. Mohammad Hafidz Rohani (*Malaysia*)
5. Ms. Anh Dieu Nguye (*Viet Nam*)

10:40-11:00  
Coffee break

11:00-12:00  
Collection of Workshop participants' recommendations about how to improve the APEC MSME Marketplace content and functionality

**Moderator:** Ms. Janette Toral (*The Philippines*)

A recap of previous sessions will be presented Work in groups

Closing Remarks
ANNEX 2 Workbook

APEC MSME MARKETPLACE

for MSME Exporters/Importers
DO
• TAKE YOUR FIRST STEPS ON THE FOREIGN MARKET HERE AND NOW!

TRY
• COVER YOUR EXPORT/IMPORT TASKS WITH THE HELP OF APEC MSME MARKETPLACE

CHECK
• WHAT EXPORT/IMPORT TASKS CAN BE COVERED?
EXPORT TASK #1

Find relevant information:

- market volume;
- trade statistics exported and imported goods;
- import preferences;
- certifications needed;
- trade regulations;
- trade agreements;
- trade process;
- tariffs;
- other.

Examples of HOW to find the relevant info at the APEC MSME Marketplace
EXPORT TASK #2

Get in touch with organizations that can provide relevant support

(Please check the list of such organizations provided in this workbook)

LOCAL ORGANIZATIONS CAN SIGNIFICANTLY FACILITATE EFFORTS OF MSME IN ENTERING FOREIGN MARKET AND HELP TO:
- provide relevant information;
- find potential partners;
- arrange a B2B meeting;
- arrange events participation;
- help with starting a business in an economy (register business, provide free office, hire staff etc.);
- find training programs for MSMEs;
- other.

HOW to find such organizations on the APEC MSME Marketplace?

SAMPLE OF THE INQUIRY LETTER*
Please check APEC MSME Marketplace Export and SME Agencies directory

Write an inquiry using an example below.

Dear *name of CEO*,
*Name of the trade agency* is exploring opportunities to make the *economy* a possible market for new products, innovations, technologies and components. In this regard, our collaboration can be of interest to you.
*Brief information about yourself and the company*
We have found your organization at APEC MSME Marketplace and are wondering if you could help us.
*Brief information about the product*
We are looking for potential partners in the *economy*: distributor or official representative of our company, including the possibility of exclusive rights to sell our products in the economy.
Please let us know if you can help us to get in touch with potential partners or provide other support.
Thank you for your time and attention.
Looking forward to getting your feedback soon.

*To receive an inquiry letter as a Word Office document, send a request at pro@smartbusinesstrips.com
EXPERIMENTAL SYSTEM

EXPORT TASK #3
Get in touch with potential partners

WHAT to start with?

- Determine your potential partner, describe its profile.
- Search for the companies that meet your profile.
- Learn about the interests of your potential partner. Look through the website, read news, check portfolio and try to understand business priorities they are working on now. Try to connect your proposal and the priorities of a potential partner. Develop an INDIVIDUAL proposal for each partner.
- Keep in mind that it is better to get in touch with decision makers in the company and write personal invitation for cooperation to CEO.

HOW to find partners on the APEC MSME Marketplace?

There are several ways to find potential partners on the platform

THROUGH MSME DIRECTORY
MSME Directory > *wanted economy*

•MSME directory > Papua New Guinea > Emstret Holdings Limited
https://www.emstret.com/

THROUGH TRADE ORGANIZATIONS
Member Economy > *wanted economy* > Export and SME Agencies

•Member Economy > Japan > Jetro > to Japan > Directory for Doing Business in Japan

THROUGH LOCAL MARKETPLACES
Marketplaces > Government/Private > *wanted economy*

•Marketplace > Government > Republic of Korea > tradeKorea > Matching services > Global Business Matching Service
https://www.tradekorea.com/ebms/gbms.do
REGISTER ON THE MARKETPLACES

Registering on the marketplaces means:
- possibility to sell your product directly to the customer;
- possibility to buy directly from the producer;
- increase the probability to find partners;
- ensure additional advertisement for the product;
- keep the trade secured by regulations of the marketplace.

HOW to find marketplaces in different APEC economies?

on the APEC MSME Marketplace

MARKETPLACES
Marketplace > Government/Private
> *economy choice*

Be ready to provide the below mentioned info upon registration:

1. information about the company (name, address, type, slogans, logo, history, website, contact data);
2. information about the product/service (products lineup, photo, overview, description, product advantage, photo);
3. certifications, trademarks, patents, awards;
4. media publications;
5. trade details (currency, export performance);
6. terms of packing and shipping.

The Papua New Guinea (PNG) Customs Service has responsibility for three key functions:
- Border and community protection
- Trade Facilitation
- Revenue collection

This is a market leader in helping both local and foreign companies to successfully do business globally, by providing a full suite of multi-lingual commercial representation and back-office services.

The Department’s **main goals:**
- To develop training modules on export and import techniques and procedures.
- To raise the level of awareness of Philippine businesspersons on export opportunities and the availability of alternative sources of import products or diversified markets for export.
- To offer specialized courses for specific industry groups directed at overcoming barriers to overseas market penetration.
- To conduct training programs in international trade practices, inspection techniques and exhibition mounting.
